[portfolio](#)

I have 6 years of frontend development with passion for user interfaces, experienced in progressive web applications, highload apps and multiple projects ahead.

Skills

- Frontend: JavaScript ES6+ | React | Redux | Vue.js | Vuex | Pinia | Nuxt.js | TypeScript
- Backend: Node.js | Express.js | Php | Bitrix
- Databases: PostgreSQL | MySQL | MariaDB
- Markup and styles: HTML 5 | CSS (SCSS, Tailwind) | WebComponents
- Other: Vite, Gulp, Webpack, Git, BAM, adaptive cross-browser layout, working with drafts (psd, Figma)

ONETECH 2+ years (10.22 - Present)

- Started as a developer and progressed to Stream Lead.
- Key contribution was transitioning the architecture from a monolithic structure to a modular one.
- Enabled the team to execute seamless release cycles without delays.
- Further developed internal company products, including a billing widget and the Backoffice UI Kit library.
- Successfully implemented the UI Kit library into the workflows of other teams.

Intec, internet-agency: 06.21 - 09.22 (1y 3m)

- Leading the development of templates for online stores using Vue, Node.js, and PHP
- Developing and maintaining SPA with SSR setup Implementing complex interactive features and custom modules
- Testing site functionality and compatibility before production launch
- Mentoring trainee and junior developers, participating in code reviews
- Maintaining technical documentation

Netris, web studio: 06.19 - 05.21 (1y 11m)

- Development of an educational platform using the stack: Vue + Pinia + TypeScript + PHP + Laravel + MariaDB + Redis
- Performance optimization of the platform, bug fixes Collaborating with the design team to convert designs into functional and responsive web pages
- Implementing security precautions to protect personal data
